Actions

Get started with CloudWatch

You don't have any alarms, metrics or default dashboard. Once you set them up they will be displayed here. [View getting started page](#)

Set alarms on any of your metrics to receive notification when your metric crosses your specified threshold.

[Create alarms](#)

Create and name any CloudWatch dashboard **CloudWatch-Default** to display it here.

[Create a default dashboard](#)

Monitor using your existing system, application and custom log files.

[View logs](#)

Write rules to indicate which events are of interest to your application and what automated action to take.

[View events](#)

Get started with Application Insights info

Set up monitors and dashboards to detect issues and resolve problems with enterprise applications, databases, and workloads.

AWS Cost Management

AWS Billing Conductor

Simplifying your billing practice

Use AWS Billing Conductor to customize your bill computation and display your billing data in a meaningful way to you and your end users.

Create custom pricing configuration

Get started by creating pricing rules to customize your billing rates across your billing groups.

Create pricing rules

Pricing (US)

Your costs are based on the number of accounts you assign to your billing groups, with a flat monthly rate per account. New customers are eligible for a 2 month (62 day) free trial.

[Pricing for AWS Billing Conductor](#)

[See AWS Pricing Calculator](#)

How it works

AWS Organizations
Create your consolidated billing family

AWS Billing Conductor
Customize your billing data by account and rate to share with your end users

Define billing parameters
Assign accounts to billing groups, define pricing logic and assign credits and fees

Pro forma billing computation
Generate and display cost data at your defined rates for each billing group

AWS Cost & Usage Report
Bills page
Reporting
View cost and usage data per billing group
